

For Immediate Release**Vector Software Announces Support for TASKING C166 compiler on Infineon chips**

East Greenwich, RI – August 27, 2009. Vector Software, the leading provider of software test tools for embedded systems, today announced support for the TASKING C166 compiler. Previous versions of VectorCAST already supported the TASKING compiler on 56k chips. The latest release now supports a variety of chips based on the C166 architecture, such as the C167, XC2287 and XC2364.

VectorCAST's integration with the TASKING compiler leverages the capabilities of the TASKING Script Debugger, which makes it possible to execute test cases on target or with the simulator automatically. The TASKING compiler is made by Altium, the industry's leading developer of electronic product development solutions.

"As a proud TASKING partner, we are pleased to be able to expand our offering to the TASKING user community" says Bill McCaffrey, Director of Marketing at Vector Software. "This latest integration was done in support of a customer from the automotive industry. With the rapid rise of embedded software, all industries are struggling to maintain the highest level of quality. To help them, we intend to keep bringing the benefits of automated software testing to embedded developers across multiple platforms".

About Altium

Altium Limited (ASX:ALU) is the industry's leading developer of electronic product development solutions dedicated to unifying the different design disciplines involved in electronics product development. Altium products ensure all electronic engineers, designers, developers, and their organizations, take maximum advantage of emerging design technologies to bring smarter products to market faster and easier. Founded in 1985, Altium is headquartered in Sydney, Australia with sales offices in the United States, Europe, Japan, China, and resellers in all other major markets.

Visit Altium.com for more on Altium.

About Vector Software

Vector Software, Inc. is the leading independent provider of automated software testing tools for developers of safety-critical embedded applications. Vector Software's VectorCAST line of products, automate and manage the complex tasks associated with unit, integration, and system level testing. The VectorCAST tools support the C, C++, and Ada programming languages.

Vector Software's Product Family:

VectorCAST/C++
VectorCAST/Ada
VectorCAST/RSP
VectorCAST/Cover
VectorCAST/Manage
VectorCAST/Requirements Gateway
Modified Condition / Decision Coverage (MC/DC) module
DO-178B Qualification Packages
